Some reasons why people edit wikipedia ?

Ideology – Knowledge should be free

Fun – Enjoying the activity

Values – Expressing values to do with altruism

Enhancement – Demonstrating knowledge to others

Understanding – Expanding knowledge through activities

Social – Engaging with friends,

The number of female editors joining Wikipedia has been steadily increasing over the past few years.

Few points before editing – 4 pillars of Wikipedia

- 
- 
- **Content:** Many Wikipedians consider content the most important factor in judging an article's quality. To ensure consistent quality, the Wikipedia community created these four guidelines.
 - **Provide Sources:** Writers are encouraged to provide sources for further information. Every fact should be verifiable by a reliable source.
 - **Neutral Point of View:** Articles must be written fairly, without bias, and present previously published notable views.
 - **No Promotional Content:** Promotional material, how-to instructions, resumes, and sales catalogs do not belong in Wikipedia.
 - **No Original Research:** It is not appropriate to include your own new ideas on a subject (Wikipedia calls this original research), or your personal opinions about a subject.

Few points before editing – Structure of interface

As you get started, it's helpful to familiarize yourself with the interface and how to navigate Wikipedia pages.

Talk

Each article has a corresponding Talk page where contributors can leave comments and suggestions, discuss changes, and ask for help from one another.

Featured content

Here you can find some of the best work on Wikipedia: articles, photographs, and other content that meet the community's highest standards.

Help

The Help pages, just like the articles, are written by Wikipedia contributors.

Community portal

The community portal lets you explore what's going on across Wikipedia, from news to collaborations to policy discussions.

Tools

This section has useful tools for getting more information about a page and its history.

Languages

These are the other language versions of Wikipedia — out of more than 280 — that have an article on the same topic.

Language settings

These settings allow you to change the language used for menus and select your keyboard layout.

The screenshot shows the Wikipedia homepage with various sections and annotations. The main header includes the Wikipedia logo and the text "WIKIPEDIA The Free Encyclopedia". Below this is a navigation menu with links to the Main page, Contents, Featured content, Current events, Random article, and Donate to Wikipedia. A sidebar on the left contains links to the Interaction section (Help, About Wikipedia, Community portal, Recent changes, Contact page), Tools, Print/export, and Languages. The Languages section lists various languages including Afrikaans, Akan, Alemannisch, العربية, Aragonés, Azərbaycanca, Bamanankan, বাংলা, Bân-lâm-gú, Basa Banyumasan, Башҡортса, Беларуская, and Беларуская (тарашкевіца). The main content area features an article titled "Encyclopedia" with a sub-header "From Wikipedia, the free encyclopedia". The article text discusses the definition and history of encyclopedias, mentioning "Naturalis Historia" and "encyklios (ἐγκύκλιος)". A quote from Diderot is included at the bottom: "—Diderot^[12]". A "Contents" table is visible at the bottom right, listing "1 Characteristics" and "2 History", with "2.1 Ancient times" under History.

Article Talk

Encyclopedia

From Wikipedia, the free encyclopedia

This article is about the type of reference work.

An **encyclopedia** (also spelled **encyclopaedia**) is a type of reference work — a compendium holding information from either all branches of knowledge or a branch of knowledge.^[2] Encyclopedias are divided into entries, which are usually accessed alphabetically. Encyclopaedia entries are longer and more detailed than dictionary entries.^[3] Generally speaking, unlike dictionaries, encyclopedias focus on linguistic information about words, encyclopedias focus on factual information to cover the thing or concept an article name stands.^{[4][5][6][7]}

Encyclopedias have existed for around 2,000 years. The first encyclopedia, *Naturalis Historia*, was written in ca. AD 77 by the Elder Pliny. The modern encyclopedia evolved out of the 17th century. Historically, some encyclopedias were published in one volume, but some, such as the *Encyclopædia Britannica*, were published in multiple volumes. The world's largest *Enciclopedia universal ilustrada europeo-americana*, such as Wikipedia, are electronic.

The word *encyclopedia* comes from the Koine Greek *enkyklios* (ἐγκύκλιος), meaning "circular" or "education, rearing of a child";^[10] it was reduced to the modern form by the phrase literally translates as "complete instruction".

Indeed, the purpose of an encyclopedia is to provide a general system to the men with whom we live. The preceding centuries will not become useless to the instructed, will at the same time become rendered a service to the human race in the future.

—Diderot^[12]

Few points before editing – What to do , more importantly what not to

Inappropriate

***Britannica* and the Future of Encyclopedias**

Encyclopædia Britannica, although a celebrated and historically significant encyclopedia, has little relevance in modern society. Instead, most experts agree that the future of the encyclopedia genre belongs to Wikipedia and other wiki encyclopedias — created by regular folks like you and me. Ironically, while it was a great influence on Jimmy Wales and the intrepid new generation of amateur encyclopedists who created — and continue to create — Wikipedia, *Britannica* in recent years has come to symbolize everything wrong about the old ways of creating and distributing knowledge: top-down control, unaccountable gatekeepers who decide what does and does not merit coverage, copyright restrictions and high prices that limit access to the wealthy, and — in its current online form — intrusive advertising that undercuts the reliability and usability of its content.

What to avoid:

Don't create new essay-like articles or sections.

Don't structure your writing as an argument.

Don't use "weasel words" (like "most experts agree" or "some people say").

Don't use colloquial language or slang.

Don't use "peacock terms" (like "great", "extraordinary", or "intrepid").

Don't inject personal opinion into the writing.

Don't use overly complex language and sentence structure.

Appropriate

Since the early 1990s, the *Britannica* has faced new challenges from digital information sources. In rapidly changing fields such as science, technology, politics, culture, and modern history, the *Britannica* has struggled to stay up-to-date, a problem first analyzed systematically by its former editor Walter Yust. ^[1] Although the *Britannica* is now available both in multimedia form and over the Internet, its preeminence is being challenged by other online encyclopedias, such as Wikipedia. ^[2]

Do:

- Use plain language
- Be brief
- Cite sources to back up factual claims
- Attribute viewpoints to the people who hold them
- Avoid stating conclusions, except when attributed to a specific source

Where to start ?

WikiGnome is a wiki user who makes useful incremental edits like spelling correction

Copy editing (also copy-editing, copyediting) is the work that an **editor** does to improve the **formatting**, style, and accuracy of text.

Formatter: Structures or "wikifies" articles, using wiki markup, so they are easier to read. When Formatters come across a page that says, "This page needs clean up", they use their skills to improve the overall structure of the article

Maintainer: Monitors articles for biased edits and corrects them.

Illustrator: Uploads images, photographs, maps, and visual aids relevant to the article.

Author: Adds information to articles from books, websites, newspapers, and other credible sources. An author also initiates the creation of new articles.

Reference checker: Evaluates references provided at the bottom of the article to check if they are verifiable sources. When reference checkers find a sentence with [citation needed] next to it, they add a reference if to a verifiable resource that validates that view.

Mediator: Moderates discussion on controversial topics, helps resolve disputes, and provides guidance on contributor behavior.

Step 1: Pick a topic you want to write more about.

Step 2: Find a reliable source that covers the topic better than the current Wikipedia article.

Step 3: Now comes the fun part. Click the **Edit** button! 

Step 4: Add some of what is missing. Using the source you've found, summarize the information you want to add in your own words. **D**

Step 5: At the end of your new block of text, add a reference. In the edit toolbar — whether you're using wiki markup or the VisualEditor — you can click the 'cite' icon to cite your source. 

Step 6: In the 'edit summary' field, add a brief description of what you've done in your edit.  (With VisualEditor, you'll be prompted for an edit summary after you click **Save page**.) The edit summary helps other editors understand what you are doing.

Step 7: Now it's time to save your changes. Be sure to click **Save page**.

Creating a Wikipedia article – Use Sandbox :)

When you start your article you will need a place to work. Create your own workspace or "sandbox" where you can edit your article until it has the three elements.

To use your sandbox, click **My sandbox** at the top right.

You can use this page to draft your article. Do not forget to click **Save page** when you are done editing. When you are ready, find another Wikipedia editor who might be interested in the topic. One way to find an editor is to look at the **View history** tab of an article on a similar topic and see who has contributed to that article. Leave a message on that editor's **Talk** page with a request to review your article. When you are ready, use the **Move** button, available from the pulldown menu next to the Search box, to move your sandbox page into the encyclopedia. In the "new title" pulldown, select "(Article)," then put the article title in place of the name of your sandbox page, explain what you are doing in the "Reason" box, and click **Move page**.

Now, that you have created a new article, do not stop here. Link your article to other articles where your topic is mentioned.

Try it!

What are the three elements to incorporate in your new article? Select the correct answer.

- ☐ A summary, its notability, and a source
- ☐ A summary, a picture, and a link to another article
- ☐ A name, its notability, and a source

Creating a Wikipedia article – Things to be taken care of

Search the article title. If the article does not exist, you will see the article title in a red hyperlink. Click the hyperlink to start editing a new article.

Your new article will get a good start if you remember to provide the following three elements:

1. Summary of the topic
2. Reason why the topic is notable
3. Reference to a credible source about the topic
